

Consultancy

ClearAudio Systems specialize in providing safe, sophisticated and secure communication solutions for both customers and staff. We have the proven knowledge and experience to provide our clients with bespoke audio solutions, thus equipping them with the wherewithal to an enhanced level of service to their customers.

The company provides an invaluable service by ensuring that clients are fully informed and equipped to comply with the Disability Discrimination Act (DDA) whilst improving the working space and safety of staff and customers when communicating in a face-to-face setting.

From security screen communication products and induction loops for the hard-of-hearing to infra-red and radio systems for conference and training room use, Clear Audio Systems offer turnkey services by providing highly effective solutions that not only improve communication with customers but make the client legally sound and compliant with current DDA legislation.

HOW WE DO IT

Our early project input benefits the client's approach to designing, planning and implementing modern audio systems within their premises. It all begins with our Consultancy service, scoping out the nature of our client's challenge and then using these outputs to develop solutions to overcome the audio barriers.

Our Consultancy offering includes:

- RoomAcoustic Design Review
- Recommendation of Audio Input and Output Devices
- Electromagnetic Noise Measurement
- SpectrumAnalysis of Background Noise
- Sound Pressure Measurements
- Public Address Specification
- CPD Seminars and Professional Development
- DDA Access Audits
- Client Education & Training for all types of Sound Reinforcement, PA and Audio Systems
- On-site Training & Demonstration
- Wireless Survey for Radio Microphone usage
- Site Survey Reports for DDA compliance (Induction Loop & Infra Red)
- System Optimisation
- Deaf Awareness Training
